

# SUBCONTRACT MANUFACTURING?

With over 50 years of manufacturing experience we can guarantee you a low-cost solution.

## AUTOCAD Drawing and Design Suite

If clients are not able to issue detailed manufacturing drawings, we can provide them, very often at no cost. We can also import designs, then modify and upgrade them to client requirements.

RDM's state of the art facilities offer a capacity well in excess of that required for manufacturing our own products. For this reason we are able to offer our clients a first class and most importantly low-cost sub-contract manufacturing service.

## CNC Sheet Metal Punching and Folding

We can manufacture almost anything out of sheet metal! Our latest CNC punching equipment allows us to manufacture small to very large sheet metal components with tremendous accuracy and at very low cost.

## Assembly

## Precision Drilling

We have facilities for drilling and preparing parts and small assemblies prior to assembly or as part of an assembly process, all to suit client requirements.

## Electrical Controls

Our electrical and electronics division can design and manufacture all types of industrial electrical control systems, including printed circuit boards, control panels and industrial electrical installations and repairs.

We offer a complete manufacturing service, including final assembly and can adapt to a huge range of client requirements. We have the space and facilities to set up production lines to suit our clients' needs.

## Steel Fabrications

Our factories have the ability to offer clients the full manufacture of all types of metal fabrication, structures, ductwork, enclosures etc. We can manufacture out of almost all types of metal, including stainless steel. MIG and TIG welding is available.

## Painting and Powder Coating

Our in-house paint shop incorporates automated parts degreasing, spray painting, powder coating and curing.

## Quality Control

Design, manufacture and installation are all carried out to the highest quality standards, ISO 9001

## Deliveries & Service

We can deliver directly to clients or to site. We also offer on-site, technical assistance and support.
